

Comstock Resources, Inc. Announces Successful Well at Double A Wells Field

February 24, 2000

FRISCO, Texas, Feb. 24 /PRNewswire/ -- Comstock Resources, Inc. (NYSE: CRK) ("Comstock" or the "Company") today announced the production test results of the W. T. Carter Brothers #14. This well was drilled to a total depth of 14,180 feet and was completed in the upper Woodbine formation through perforations from 13,892 feet to 13,944 feet. The well's completion was tested at 8.6 million cubic feet of natural gas per day and 677 barrels of condensate per day (12.7 million cubic feet of natural gas equivalent per day) flowing on a 26/64 inch choke at 3,075 pounds per square inch flowing tubing pressure. Comstock owns a 49.5% working interest and is the operator of this new well. This well is the fifth successful well drilled at Double A Wells field in Polk County, Texas since Comstock started its redevelopment of the field in 1999. Comstock is currently drilling the Vastar Fee #1, a 17,500 foot exploratory well testing the Company's Ross Prospect south of the Double A Wells field.

Certain statements in this news release regarding future expectations, plans for drilling, estimates of oil and gas reserves and production and pricing maybe regarded as "forward looking statements" within the meaning of the Securities Litigation Reform Act. They are subject to various risks, such as operating hazards, drilling risks, and the inherent uncertainties in interpreting engineering data relating to underground accumulations of oil and gas. Actual results may vary materially.

Comstock Resources, Inc. is a growing independent energy company based in Frisco, Texas and is engaged in oil and gas acquisitions, exploration and development primarily in Texas, Louisiana and the Gulf of Mexico.
